ANDROID MOBILE APPLICATION DEVELOPER

Final year B. Tech student specializing in Frontend Mobile application development and proficient in creating User Interface for Mobile applications. Designed and developed projects in Android studio using Kotlin, Jetpack compose, XML and currently working on an exciting food ordering app. Got certified in Introduction to android mobile development, kotlin UI/UX design and User Interface in Android Studio by Meta and offered by Coursera.

KEY COMPETENCIES

Technical Skills: Kotlin, XML, HTML, CSS, Git/GitHub, Jetpack Compose, UI/UX design.
Software Proficiency: Version Control system(Git/GitHub), Android Studio, Figma, VS Code, IntelliJ Idea
Soft Skills: Communication, Team work, Eagerness to learn, Attentive, Adaptability

WORK EXPERIENCE

Google for developers   **April - June 2024**
Android developer - Virtual Internship
Learned the basic concepts of Android with Compose and developed various applications related to topics in each unit. Every unit contains 2 to 3 applications in which one application have the instructions and the other should be bulit without instructions.

Aryana Bakery   **May 2024 - Current**
Android Mobile Application - Personal Project
Developed the User Interface of a food ordering app using android studio. I've built this with the help of Kotlin and XML. I've designed its UI in Figma also by taking the referrence from Bredin Bakery app design. With the help of this project I've learned about various layouts, bottom navigation and UI/UX design principles.

Little Lemon   **June - 2024**
Android Mobile Application - Training Project
Designed and developed another exciting app with similar concept as Aryana Bakery, but for my training complition. While developing this app I've learned Navigation, navgraph, lists, grids, activity lifecycle, etc.
